**What you will be doing**

- Manage and execute aspects of finance planning and performance management process and related financial decisions potentially including Strategic Plan and Annual Contract planning/forecasting, target development, financial performance reporting/analysis, financial modelling and decision support.
- Ensure a strong controls and compliance environment in your area of scope and ensure full compliance with our policies
- Help the senior manager and the business prepare critical financial data and insight that enable perspectives for business strategies and decisions
- Lead projects to improve efficiencies and improvements to ways of working and embrace a mindset of continuous improvement
- Contribute to a high-performing Finance team. You will also invest in personal development and the development of Finance peers and drive our Finance talent agenda within the organization.
- Drive the launch discussions from finance angle and ensure assumptions in the financials are reasonable.
- Lead the Annual contract, and subsequent forecasts preparations. Ensure all assumptions of the forecast are well aligned with the business teams. Assist the central team to finalize the Strategy Plans.
- Conduct fund research on local and offshore funds across all asset classes.
- Produce detailed fund analysis.
- Ongoing monitoring processes to facilitate the evaluation of managers.
- Fund analytics to support all investment initiatives.
- Attend investment committee meetings and work with the team in generating investment strategies in line with the company investment philosophy.
- Provide the required analytics and data for the weekly and quarterly fund management meetings.
- Make presentations and provide market updates to the team, and the Board.
